THẦY NGỌC BÁCH IELTS

Task 1: Table

The table describes the changes of people who went for international travel in 1990, 1995, 2000 and 2005 (in millions).

Area	1990	1995	2000	2005
Africa	18.2	20.8	26.9	28.7
America	80.5	112.5	118.2	113.2
Asia and the Pacific	60.2	80.3	117.4	135.8
Europe	280.2	390.3	393.2	400.2
Middle East	9.8	11.3	13.5	15.8
Total	448.9	615.2	669.2	693.7

Report Plan:

- **Paraphrase paragraph:** describes > compares; people who went for international travel > international travellers; 1990, 1995, 2000 and 2005 > four different years.
- **Overview/summary paragraph:** (1) total numbers rose (2) compare fluctuating figures for America with other areas
- **Paragraph 3:** select and report total figures
- **Paragraph 4:** select and report relevant figures to show the similar trends in the Middle West, Asia and the Pacific, Africa and Europe.
- **Paragraph 5:** select and report figures to contrast the trend in America

Report:

The table compares the numbers of international travellers from five regions in four different years.

Overall, it is clear that the total number of international travellers increased over the period 1990-2005. **However**, the figures for America fluctuated over these years.

In 1990, a total of 448.9 million people travelled internationally. There was then a sharp rise to 615.2 million in 1995, followed by less dramatic increases to reach 693.7 million in 2005.

The Middle East, Asia and the Pacific and Africa all saw a steady rise in the number of international travellers. In the Middle East, the figure rose from 9.8 million in 1990 to 15.8 million in 2005. In Africa, the number increased from 18.2 million to 28.7 million over the same period. The figures more than doubled for Asia and the Pacific, rising to 135.8 million in 2005. In Europe, the number of people travelling internationally rose dramatically from 280.2 million in 1990 to 390.3 million in 1995.

In 1990 the number for America stood at 80.5 million, rising to 112.5 million in 1995 and 118.2 million in 2000. **In contrast** to the other areas, the figure then declined to 113.2 million international travellers in 2005.

198 words

Many people go to **university** for **academic study**. More people should be encouraged to do **vocational training** because there is a **lack of** qualified workers such as **electricians** and **plumbers**. To what extent do you **agree or disagree**?

Planning the ideas

Based on our identification of the key words, our plan will be something like this:

- **Introduce idea:** many young people study academic subjects at university. This is necessary, but more vocational training is also needed.
- **Paragraph 2:** two reasons why more vocationally-trained workers are required: [1] electricians, plumbers and other trades are vital when buildings are constructed or need maintenance – example: schools, hospitals, museums – safety of public buildings in general. [2] too many academic graduates in some countries – resulting in graduate unemployment.
- **Paragraph 3:** more vocational training must be provided to meet society's needs. [1] schools must make changes in the curriculum and provide workshops to teach practical skills. [2] parents should encourage their children to consider learning a skilled trade as a good alternative to university, with good job prospects when they qualify.
- **Conclusion:** repeat using some different words.

ANSWER:

It is true that many people prefer to pursue academic studies at university rather than to follow a vocational training course. While nobody can deny the need for university graduates, I totally agree that we should encourage more people to qualify as electricians, plumbers or other essential manual workers.

There are two important reasons why more workers must be trained in skilled professions such as plumbing or electrical work. **Firstly**, such workers are vital when new buildings are constructed or when existing buildings have to be renovated or simply maintained. Indeed, in many countries, a permanent maintenance staff of skilled tradesmen is employed in hospitals, schools or museums, ensuring the safety of all who use the buildings. **Secondly**, in some developed countries, there is an existing imbalance in the economy, resulting in graduate unemployment, while at the same time there is a shortage of skilled labour. Governments in those countries need, therefore, to work with employers to ensure that extra vocational training is provided.

More people must be encouraged to attend vocational training courses. [1] The onus is on schools to incorporate relevant subjects into the curriculum, so that not all the emphasis is placed on preparation for academic study at university. Many boys and girls are not academically inclined, but this does not mean that schools should consider them as failures. For example, workshops in schools could provide an opportunity to learn 'hands-on skills', adapting the theory of the physics lessons to practical applications. [2] Parents should also help their children to choose vocational careers, explaining the good employment prospects and remuneration for manual workers with qualifications and skills

In conclusion, I agree that it is vital that we encourage more people to do vocational training because without such skilled workers, society cannot function effectively.

Đề 25/02/2023

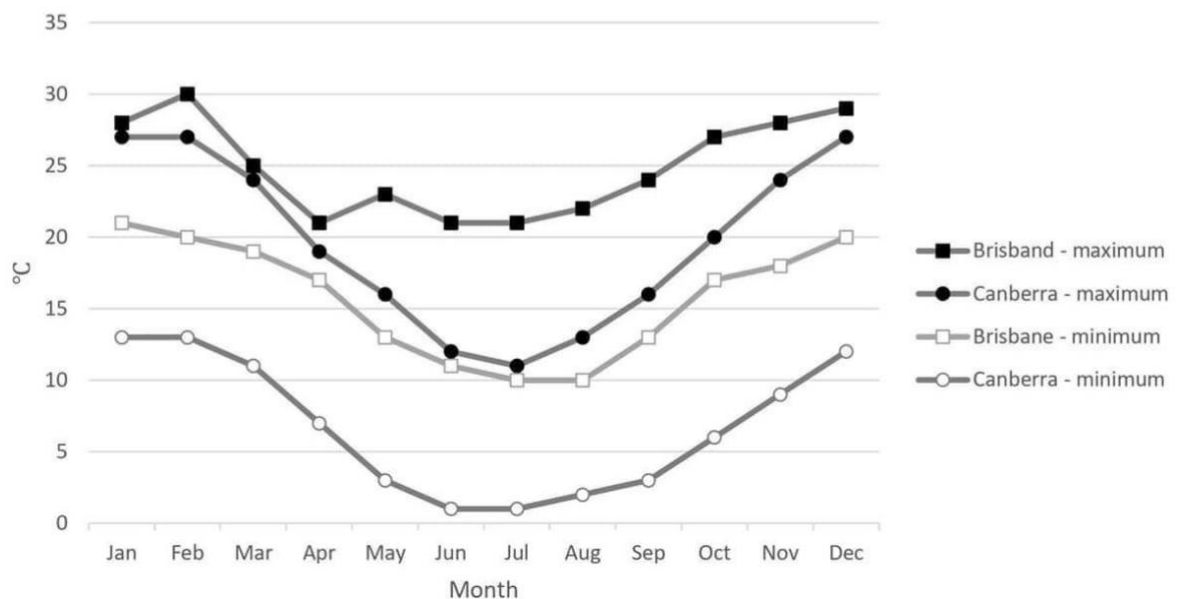

Task 1

The graph and chart below give information on the average daily maximum and minimum temperatures in degrees Celsius (°C) and the average number of days with rainfall each month for two Australian cities.

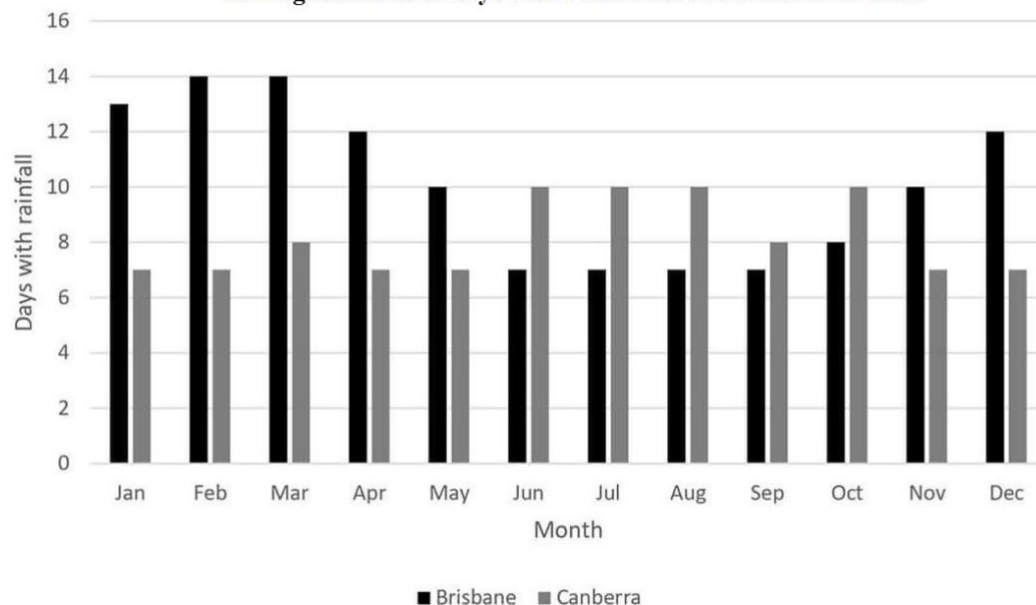

Group Pass Ielts

Ngày thi 25.02.2023

Average daily temperatures in two Australian cities

Average number of days with rainfall in two Australian cities

Report Plan:

- **Paraphrase paragraph: 2 sentences (one for each diagram): gives information about>shows/illustrates; each month>monthly; two Australian cities>Brisbane and Canberra**
- **Overview/summary paragraph: (1) daily temperatures fell February-July (2) the number of days with rainfall**
- **Paragraph 3: select and report figures and trends for the line graph (average daily temperatures). Compare figures in the two cities.**
- **Paragraph 4: select and report figures and trends for the bar chart (average days of rainfall). Compare fluctuating figures for Brisbane with more stable figures for Canberra.**

Report:

The graph shows the monthly average daily maximum and minimum temperatures for Brisbane and Canberra. The chart illustrates the average number of days with rain for these two cities per month.

Overall, daily average temperatures fell between February and July in both cities. The average number of days with rainfall was generally higher in Brisbane, although the figure was higher in Canberra from June to October.

In January, the average daily temperature was about 27 degrees for both cities, rising to a peak of 30 degrees in Brisbane in February while remaining constant in Canberra. Whereas temperatures remained higher in Brisbane, in both cities the average maximum temperatures decreased from February to July, when they were 21 degrees and 11 degrees in Brisbane and Canberra respectively. They then rose steadily to reach 29 degrees in Brisbane and 27 degrees in Canberra in December.

The average number of days with rainfall fluctuated between 12 and 14 between December and March in Brisbane, compared with 7 days from June to September. In contrast, in Canberra the figures were more stable, with just 7 or 8 days with rainfall from November to May, rising to 10 days from June to August.

198 words

Task 2

An increasing number of people choosing to have cosmetic surgery in order to improve their appearance. Why do people have operations to change the way they look? Do you think this is positive or negative development?

Essay Plan:

- **Introduction: there are reasons, but in my view it is a negative trend**

- **Paragraph 2: reasons – (1) to attract a partner (2) media influence – for example, promoting the view that you must look like a supermodel to be attractive**
- **Paragraph 3: negative because – (1) it sets false values; character not beauty is to be valued in a person (2) cosmetic surgery is a waste of time, skills and resources – doctors and operating theatres (3) surgery can go wrong**
- **Conclusion: reasons can be suggested, but it is a negative development**

Essay:

It is true that growing numbers of people are opting to have cosmetic surgery to enhance their looks. **While** there are reasons which may explain this trend, I would argue that it is a totally negative development when undertaken for this reason.

In many cases, often influenced by media propaganda, people undergo cosmetic surgery in order to attract a partner. The role of commercial advertising is to sell products – sometimes through selling an image of beauty. **For example**, there are only a few supermodels in the world, but they promote an image of beauty which is impossible for most people to achieve. Instead of criticising this marketing strategy, a few people who can afford it decide to try to look like supermodels through cosmetic surgery. The idea then spreads, through social networking sites and telemarketing, that it is socially acceptable to have cosmetic surgery. You will then become irresistibly attractive to others.

I consider this development to be wholly negative. **Firstly**, the real value of a person should be measured by their character, not their physical appearance. Promoting the idea that a person should be defined by their physical beauty is to promote a false set of values. **Secondly**, surgeons who carry out cosmetic surgery could be using their skills and time to help people with life-threatening conditions. Operating theatres in which this surgery is carried out could also be freed to conduct essential operations. **Finally**, undergoing cosmetic surgery may be detrimental to health. All operations carry some health risk, and sometimes cosmetic surgery may go wrong.

In conclusion, although reasons can be put forward to try to explain this development, I believe that it is a negative trend.

279 words

Vocabulary from *media and advertising*:

- **commercial advertising**
Meaning: advertising on the radio or television, between or during programmes.
Example: **Commercial advertising** on television provides the revenue for most TV channels.
- **telemarketing**
Meaning: a method of selling things or taking orders for sales by telephone
Example: **Telemarketing** has become a growth industry, employing millions of people across the world.

Vocabulary from *society*

- **social networking sites**
Meaning: a website that you use to communicate with people who share your interests
Example: An excellent way to learn another language is to make friends on **social networking sites** with people who speak that language.
- **to be socially acceptable**
Meaning: agreed or approved of by most people in a society
Example: Smoking in public places is no longer **socially acceptable** in many countries.

Vocabulary from *health*:

- **life-threatening conditions**
Meaning: illnesses which are likely to kill somebody
Example: Great advances have been made in the treatment of **life-threatening conditions** such as cancer and heart disease.
- **operating theatre**
Meaning: a room in a hospital where doctors carry out surgery on patients
Example: Safe hygiene standards are important throughout any hospital, but particularly in an **operating theatre**.
- **to be detrimental to health**
Meaning: to be harmful to health
Example: Lying in the sun for too long can **be detrimental to health** and result in skin cancers.
- **to carry health risks**
Meaning: to have effects which could be bad for one's health
Example: Smoking and drinking alcohol are potentially dangerous habits, because they carry serious health risks

Other vocabulary:

- **to enhance** [verb]:
Meaning: to improve the quality, amount or strength of something
Example: After the terrorist threat, the government **enhanced** security measures.
- **looks** [plural noun]:
Meaning: attractive, pleasing appearance
Example: He has got the **looks** to be a movie star.
- **irresistibly** [adverb]:
Meaning: in a way that it is so strong that it cannot be stopped or resisted

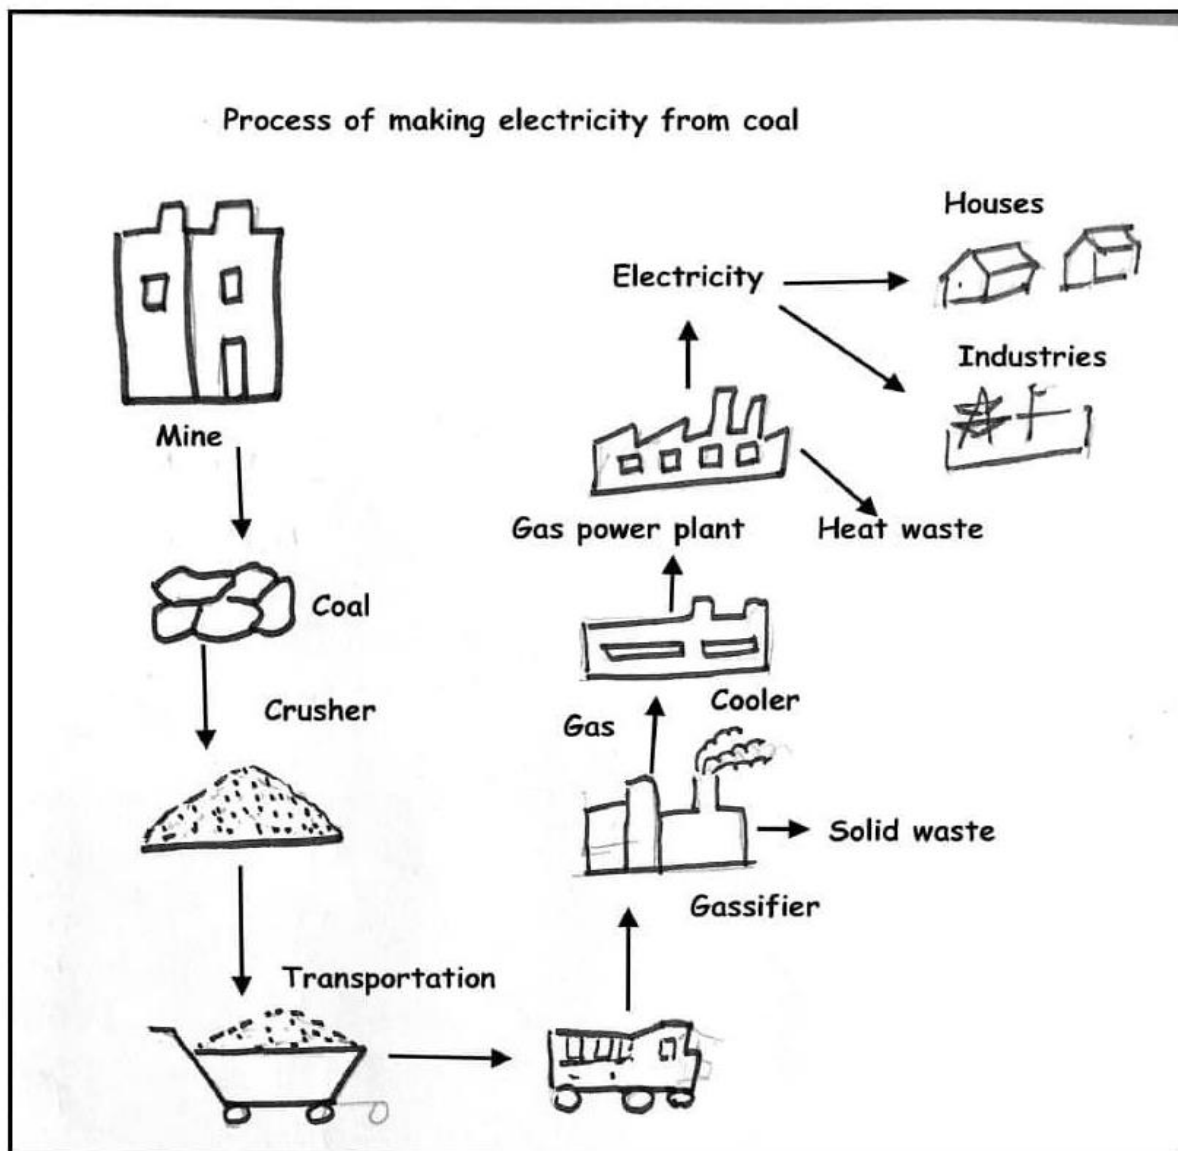

Example: The army advanced **irresistibly** into the territory of the enemy.

- **to free** [verb]:

Meaning: to make somebody/something available for a particular purpose

Example: Removing the ruins of an old building **freed** space for ten new houses.

WRITING TASK 1

The given picture shows the process of making electricity from coal. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Report Plan:

- Paraphrase paragraph: shows>illustrates; the process of....>how electricity...
- Overview/summary paragraph: (1) seven stages (2) note the first/last stages
- Paragraph 3: report on steps 1-4 – from the mine to the gasifier
- Paragraph 4: report on steps 5-7 – from cooling to electricity production and supply

Report:

The diagram illustrates how electricity is made from coal.

Overall, there are seven stages in this process, starting with the extraction of coal from mines and ending with the supply of electricity to houses and industries.

First, coal is extracted from a coal mine and it is **then** crushed by machine into small pieces. **Next**, the crushed coal is transported by cart and truck to an installation called a gasifier. **At this stage**, as a result of heating, gas is produced and the coal is set aside as solid waste.

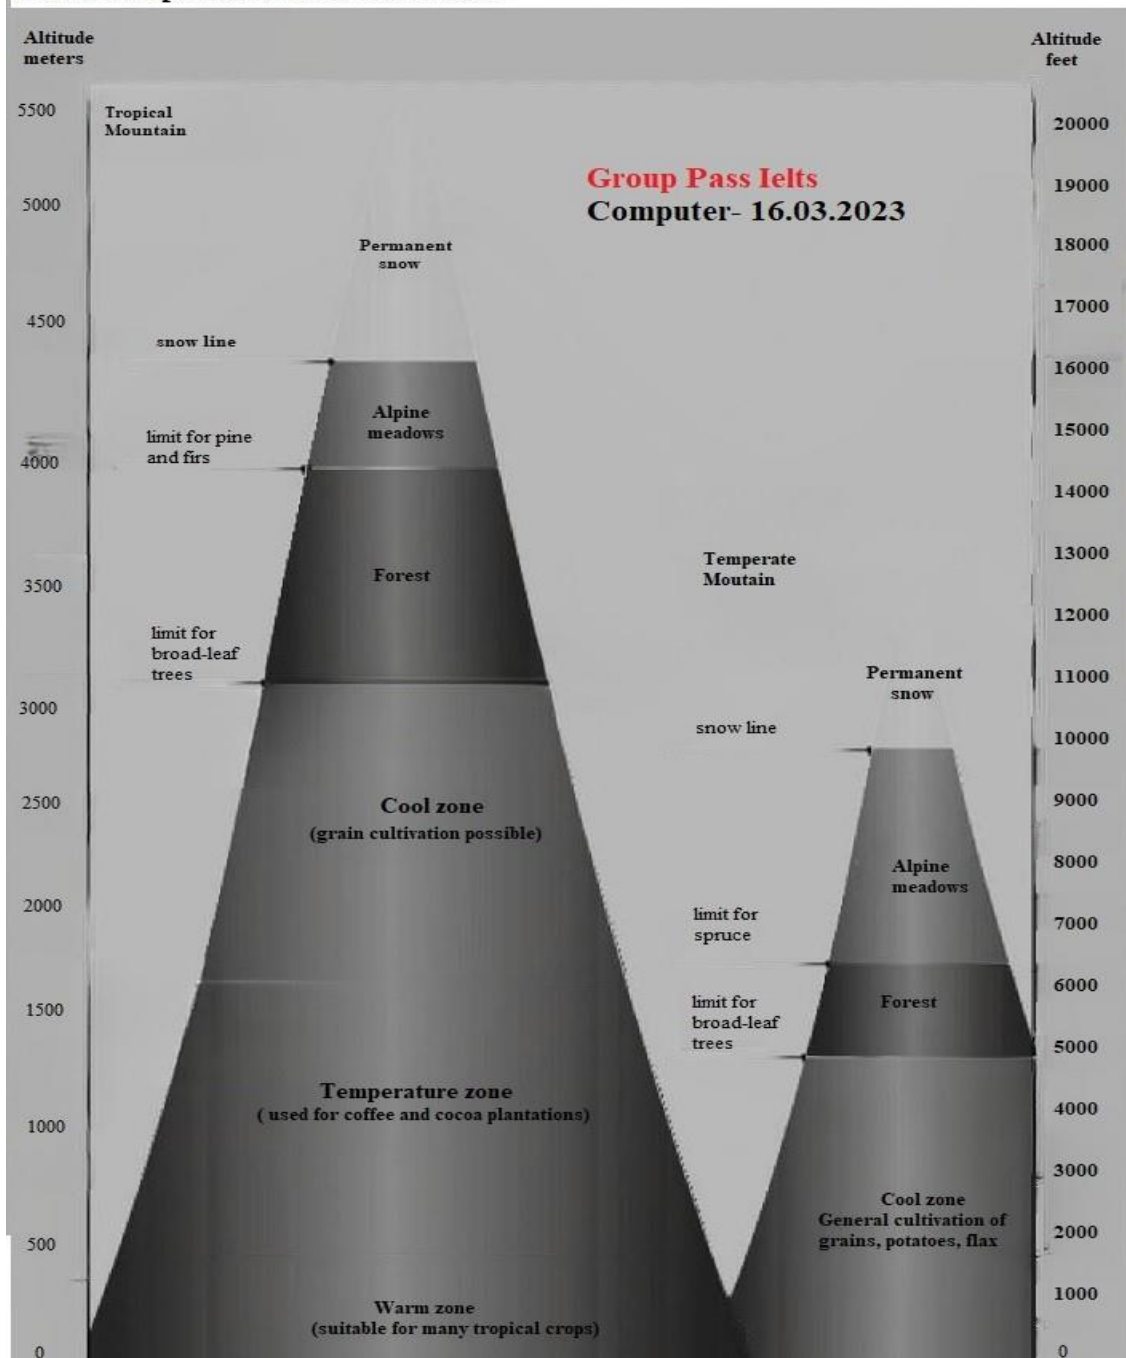

The heated gas is **then** cooled in a separate installation, ready to be sent on to the **next** stage in the process, which takes place in the gas power plant. In this plant, electricity is produced from the coal gas, and some heat is generated which is disposed of as waste. At the **final** stage, electricity is ready to be supplied to either domestic consumers or to industries.

Written by NgocBach

The diagram shows differences in temperature zones between tropical mountains and temperate mountains.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Report Plan:

- **Paraphrase paragraph:** shows differences > compares; add “in terms of their vegetation”

- **Overview/summary paragraph:** (1) vegetation will grow at higher altitudes in tropical regions (2) tropical mountains have more diverse zones than temperate mountains
- **Paragraph 3:** select, report and compare figures for the snow line and alpine meadows in the two regions
- **Paragraph 4:** select, report and compare figures for the zones below these in the two regions

Report:

The diagram compares tropical and temperate mountains in terms of their vegetation.

Overall, in tropical regions vegetation will grow at higher altitudes **compared with** temperate regions. Mountains in tropical regions support more diverse zones than in temperate regions. There is a snow line at about 2800 metres (10,000 feet) on temperate mountains and there is only permanent snow above this line. **By contrast**, this snow line is found higher at around 4300 metres (16,000 feet) in tropical mountain regions. Below this line, alpine meadows are found at 4000 metres and 1700 metres in tropical and temperate mountain regions respectively.

Forests of pine and fir trees occur on tropical mountains from about 3100 metres to the alpine meadows above. **However**, on temperate mountains the limit for spruce trees is about 1750 metres. A similar difference is found between the limits for broad-leaved trees in the two regions. Below this, a cool zone producing grain occurs from 1600 metres on tropical mountains **while** in temperate regions this starts at sea-level. **Finally**, above sea-level, tropical mountain regions have two extra zones. A temperate zone can produce coffee and cocoa, while below that a warm zone is suitable for many tropical crops.

Task 1: Process (Hình nguồn Ielts Real Exam)

WRITING TASK 1

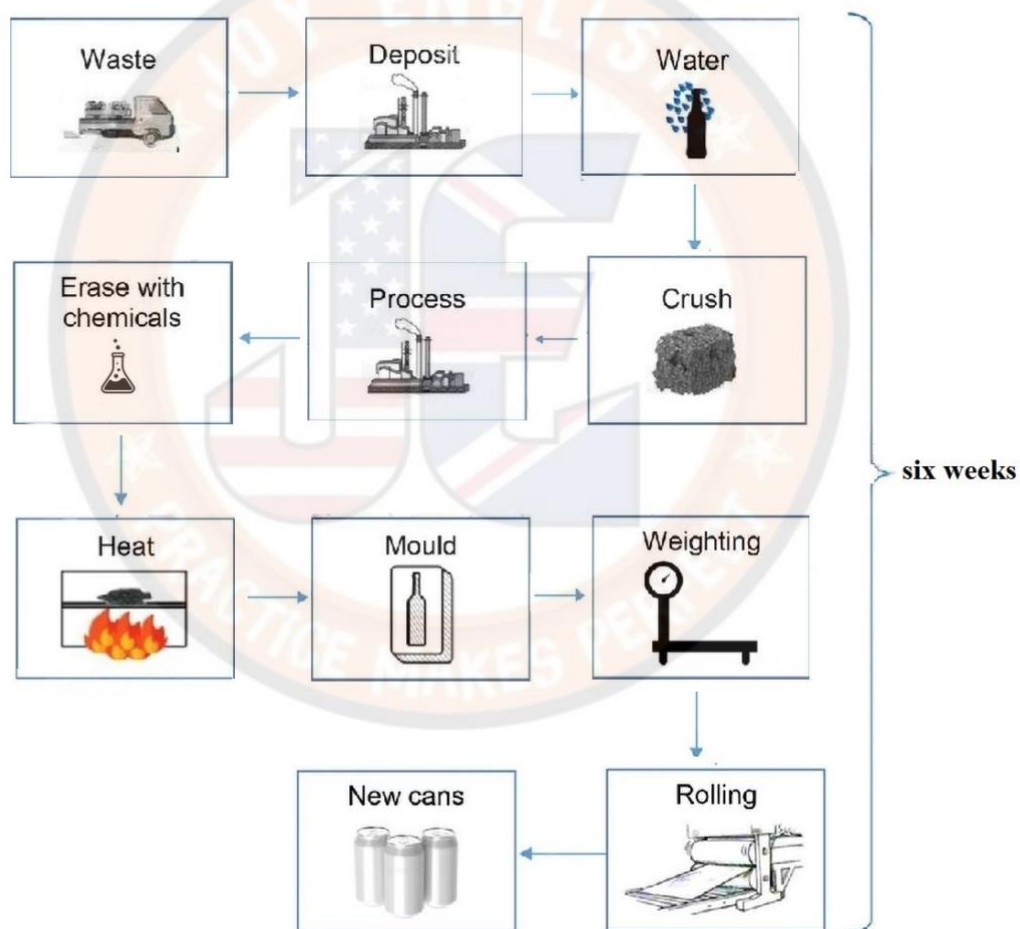

You should spend around 20 minutes on this task.

The diagram below shows the stages in the recycling of aluminium drinks cans.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Group Pass Ielts
20.04.2023

Report Plan:

- **Paraphrase paragraph:** diagram>chart; shows>illustrates; stages>different steps; recycling>the process of recycling
- **Overview/summary paragraph:** (1) 11 stages involved (2) mention the first and last stages (3) total time = 6 weeks
- **Paragraph 3:** report on the first 6 stages in the diagram

- **Paragraph 4: report on the last 5 stages in the diagram**

Report:

The chart illustrates the different steps involved in the process of recycling aluminium drinks cans.

Overall, a total of 11 stages are shown in this recycling process, from the delivery of used cans to the recycling plant to the production of new recycled cans, taking a total of 6 weeks from start to finish.

First, the recycled cans are collected and transported by trucks and **then** deposited at the recycling factory. **Next**, the cans are washed **before** they are crushed at the **next stage**. **After** crushing, the process continues in the factory, including the use of chemicals to erase designs.

At the seventh stage, the crushed cans are heated and are **then** shaped in a mould to ensure they are a uniform size. **Next**, the moulded cans are checked so that they are all the same weight **before** they pass through a rolling machine. **Finally, after** rolling, new recycled cans are produced ready for use again.

156 words

Writing task 2:

Some think most crime is the result of circumstances e.g. poverty and other social problems. Other believe that most crime is caused by people who are bad by nature. Discuss both views and give your own opinion

Essay Plan:

- **Introduction:** refer to the two views, using some different vocabulary, and give your own opinion
- **Paragraph 2:** first view - social problems: lack of money, unemployment, lack of schooling – examples: research linking crime with low-income areas; illiteracy rates in prisons
- **Paragraph 3:** second view – some individuals are just bad people and commit crimes. Need to ignore social problems and focus on individual psychology and research genetic factors.
- **Conclusion:** my opinion: first view is correct. Need to tackle social problems or crime will increase

Essay:

While many people argue that the causes of crime are largely to be found in poverty and social deprivation, others contend that crime is the result of actions by people who are simply evil. I believe that the first argument is correct, and is overwhelmingly supported by statistical evidence from thousands of studies across the world.

On the one hand, many believe that the causes of crime are to be found in social problems. Having little money, a lack of educational opportunities, and being unemployed or in low-paid jobs, some will turn to crime as a solution to their problems. **For example**, research has shown that violence, robbery and sexual offences are more prevalent in income-deprived areas. Families may become desperate, and domestic violence may result. Illiteracy rates in prisons are far higher than among the general population, as schools in poor neighbourhoods lack resources to provide a good education to their students.

On the other hand, there are some who think that criminals are simply bad people. We should not take into consideration social factors, but instead look for the causes in the psychology of individuals who commit crimes. They also argue that we must study genetic factors to explain why some embark on a life of crime. This removes the focus of attention from tackling social problems, and moves it to forms of punishment to deter individuals from evil, criminal activity. That is, bad individuals are to blame for crime and they must be taught a lesson.

In conclusion, I would argue that the first view is more convincing. It is important to look beyond the individual and see the big picture. Social problems lie behind most crime and if these problems are not tackled, crime will increase.

290 words

Vocabulary from *crime*:

- **to turn to crime/ drugs**

Meaning: to start committing crimes or using drugs.

Example: During periods of high youth unemployment, some youngsters **turn to crime** to obtain money.

- **to take into consideration**

Meaning: to think about a particular fact or detail and allow it to have some influence when you are making a decision

Example: The previous criminal records of those who are found guilty must **be taken into consideration** when a sentence is passed.

- **to embark on something**

Meaning: to start something new

Example: Young people sometimes **embark on** a life of crime as a result of the bad influence of criminals whom they know.

Vocabulary from *society*:

- **domestic violence**

Meaning: violence among family members in the home

Example: Children who witness **domestic violence** between parents often develop problems.

Vocabulary from *communication and personality*:

- **to see the big picture**

Meaning: to understand all the important aspects of a situation

Example: Students sometimes get confused with so many details to remember, but our history teacher is able to make us **see the big picture**.

Other vocabulary:

- **social deprivation** [expression]:

Meaning: limited access to society's resources due to poverty, discrimination or other disadvantage

Example: She grew up in an area of **social deprivation**, with high unemployment, no clinics and overcrowded schools.

- **to contend** [verb]:

Meaning: to say that something is true or is a fact

Example: The lawyer **contended** that her client was innocent of the crime.

- **overwhelmingly** [adverb]:

Meaning: strongly or completely.

Example: Manchester United were **overwhelmingly** defeated by Barcelona.

- **prevalent** [adjective]:

Meaning: something that is very common at a particular time or place

Example: During the war, certain diseases were **prevalent** among the soldiers.

- **illiteracy** [noun]:

Meaning: the fact of being unable to read or write

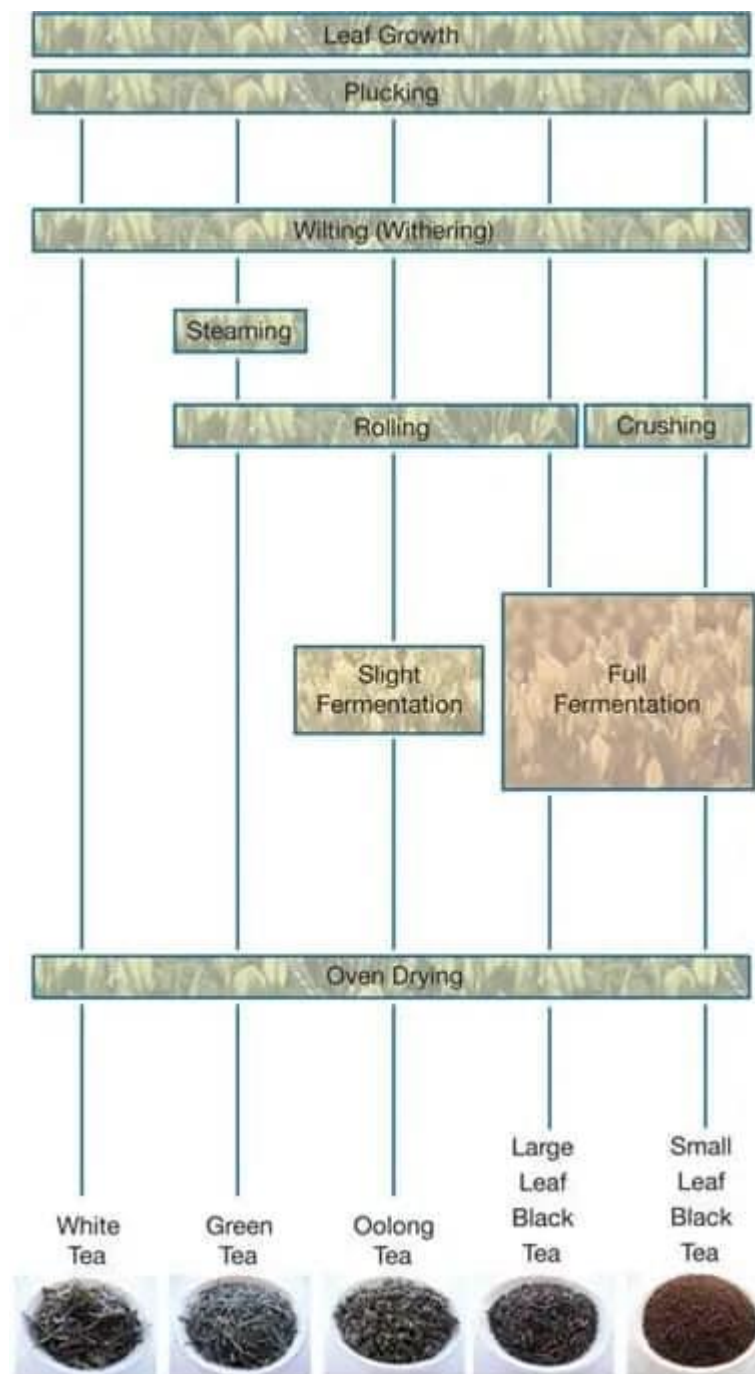

Example: The **illiteracy** rate in some countries is much too high, and education programmes are necessary to teach reading and writing.

Report:

Writing Task 1

The diagram shows how tea leaves are processed into five different types of tea.

Report Plan:

- **Paraphrase paragraph:** shows>illustrates; how tea leaves are processed>the process of making; five different types>various types

- **Overview/summary paragraph:** mention the number of different possible stages; mention the first and last stages
- **Paragraph 3:** report and compare the stages in the production of white tea, green tea and oolong tea
- **Paragraph 4:** report and contrast the stages in the production of large and small leaf black tea

Report:

The diagram illustrates the process of making various types of tea from tea leaves.

Overall, up to nine different stages may be involved in the production of tea, beginning with growing the tea and ending with the oven drying of the leaves.

The first three stages are the same for producing all five types of tea. **First**, the tea is grown, the leaves are plucked and **then** they are left to wilt or wither. To produce white tea, the wilted leaves are **then** simply dried in the oven. **However**, in the production of green tea, the wilted leaves are steamed and rolled before oven drying. The third type, oolong tea, is not steamed. **After** wilting, it undergoes rolling and slight fermentation **before** drying in the oven.

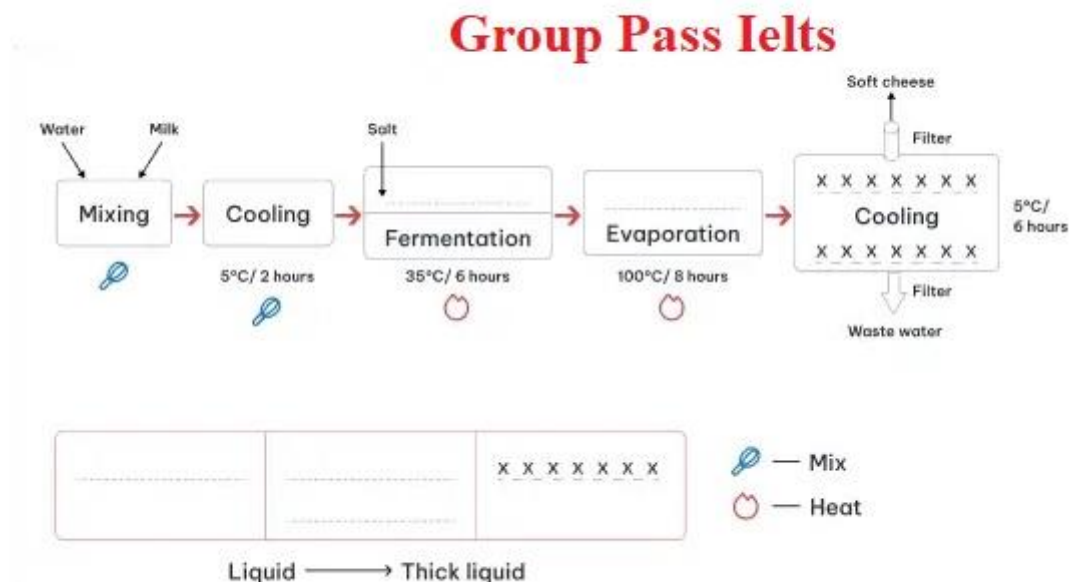

In contrast, large and small leaf black tea have more stages in the process. **After** wilting, large leaf black tea is **next** rolled and then fully fermented. The production of small leaf black tea is similar, except that it is not rolled, but crushed before full fermentation in order to produce smaller leaves. Both of these teas pass **finally** through the process of oven drying.

Task 1

The diagram below shows how soft cheese is made.

Report Plan:

- **Paraphrase paragraph:** diagram>chart; shows>illustrates; how soft cheese is made>the process of producing soft cheese
- **Overview/summary paragraph:** the number of stages in the process; refer to the first and final stages
- **Paragraph 3:** report on steps 1-3
- **Paragraph 4:** report on steps 4-5

Report:

The chart illustrates the steps in the process of producing soft cheese.

Overall, there are five stages in the process, beginning with mixing water and milk and ending with cooling to make the final product.

Initially, the basic ingredients of soft cheese, which are water and milk, are mixed. **After** they are mixed, this mixture is cooled for two hours at a temperature of 5°C. **Next**, the mixture undergoes a stage of fermentation, during which salt is added and the temperature is increased to 35°C. The fermentation takes 6 hours.

Then, the fermented mixture is evaporated. In this stage, it is heated to 100°C for a period of 8 hours. **Finally**, the mixture is cooled at a temperature of 5°C over a six hour period. During this final cooling stage, the liquid becomes thicker as it cools. After six hours, the final product,

the soft cheese, is extracted through a filter at the top, while waste water is filtered out at the bottom.

163 words

WRITING TASK 2

Some people believe that young people should choose the jobs that they want, but other people think they should be more realistic and think more about their future. Discuss both views and give your own opinion.

Many people argue that young people must take a realistic view of their future and select a job that will enable them to pursue a successful career, **whereas** others consider that they should be allowed to decide what job they want. In today's world, I agree with the view that young people should choose a job which they want and which they will enjoy.

On the one hand, some adults advise youngsters to think of the future when applying for work. They stress the benefits of having a steady job, with promotion opportunities and a chance to move up the career ladder. They may advise youngsters to do a vocational course or to obtain a university degree which will offer good job prospects. **For example**, though a child may be interested in drama or philosophy, adults may insist on a course such as business studies or accounting.

On the other hand, there are two reasons why I agree with those who believe that young people should follow their interests and find a job that they will enjoy. **Firstly**, in today's world of rapid socio-economic changes, there is no longer any job security. Work is precarious owing to the digital revolution, and future planning is impossible. **For instance**, robotics technology, although still in its infancy, has already transformed the workplace. **Secondly**, young people who prioritise job satisfaction are more likely to perform their work well. This is a much stronger motivation than money or career status.

In conclusion, the future of work is unpredictable and planning a career is a waste of time. I support the argument that young people should be free to decide which job will bring them enjoyment and satisfaction.

282 words

Vocabulary from work:

- **to pursue a successful career**

Meaning: to have a series of jobs in a particular area of work, with more responsibility as time passes

Example: While many people wish **to pursue a successful career**, for others it is more important to find work which is interesting and enjoyable.

- **to have a steady job**

Meaning: to have a job which you are unlikely to lose, but which is usually the same routine

Example: Although some people prefer to change jobs, others prefer **to have a steady job** and a set daily routine at work.

- **promotion opportunities**

Meaning: chances to move to a more important position in a company or organization

Example: Perhaps the most important factor when choosing a job are the **promotion opportunities/promotion prospects**.

- **to move up the career ladder**

Meaning: a series of stages by which you can make progress in your career

Example: Ambitious employees look for a job in which there is a chance **to move up the career ladder**.

- **job prospects**

Meaning: the chances of being successful and having more opportunities at work

Example: People with qualifications and experience usually have the best **job prospects**.

- **job satisfaction**

Meaning: the good feeling that you get when you have a job that you enjoy

Example: A high salary is not necessarily the most important factor in **job satisfaction**.

Vocabulary from *education*:

- **vocational courses**

Meaning: courses which provide students with the skills and knowledge that they need to do a particular job

Example: Governments should extend the provision of **vocational courses** for those who want to learn a trade, for example as electricians, plumbers, mechanics.

Vocabulary from *society*:

- **socio-economic changes**

Meaning: changes relating to the society and economy of a country

Example: Mass migration to cities is a result of **socio-economic changes** that include the industrialisation of agriculture.

Vocabulary from *technology*:

- **the digital revolution**

Meaning: the advancement of technology to the digital technology available today

Example: **The digital revolution** has fundamentally changed the way that people work, communicate, behave and even think.

- **robotics technology**

Meaning: the design, construction and operation of robots

Example: There are examples of **robotics technology** everywhere, from space programs to manufacturing.

- **to be in its infancy**

Meaning: to be in the early development of something

Example: It is clear that robotics technology is **still in its infancy**, and it is impossible to imagine the possible future developments.

Other vocabulary:

- **accounting** [noun]:

Meaning: the work of keeping financial accounts or records

Example: She was good at mathematics, so her teacher suggested a career in **accounting** when she left school.

- **precarious** [adjective]:

Meaning: not safe or certain

Example: He earned a **precarious** living as an artist, often having no money for food or rent.

- **to transform** [verb]:

Meaning: to completely change something, to change its form

Example: This new colour **has transformed** your room completely.

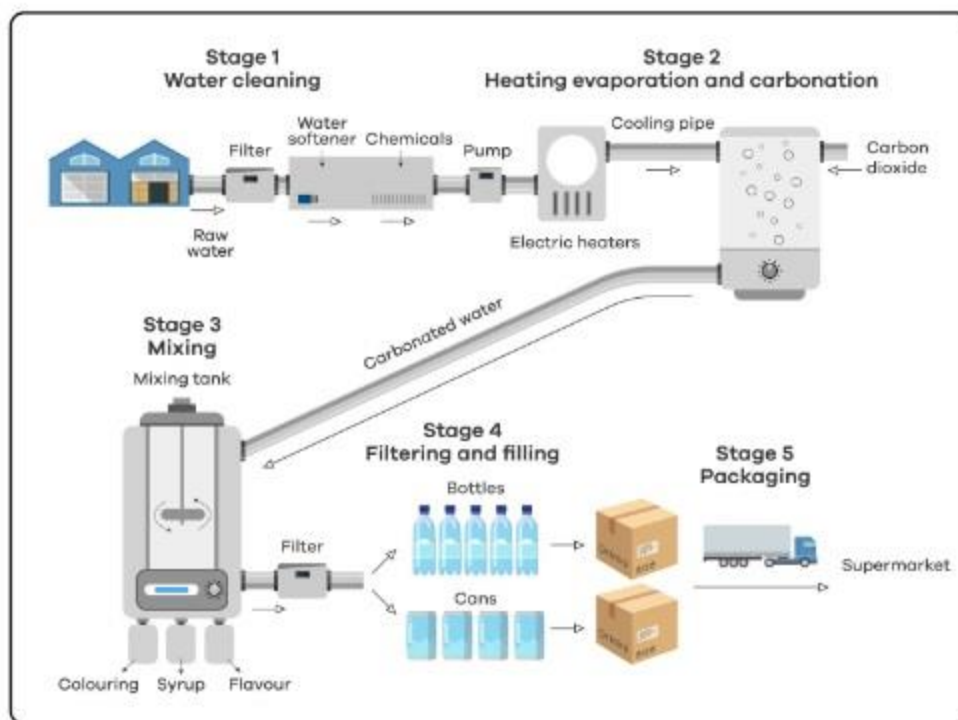

You should spend about **20 minutes** on this task.

The diagram gives information about the process of making carbonated drinks.

Summarise the information by selecting and report in the main features, and make comparisons where relevant.

You should write **at least 150 words**.

Group Pass IELTS

Report Plan:

- **Paraphrase paragraph:** gives information about> illustrates the various steps required; of making>to produce
- **Overview/summary paragraph:** (1) write the number of stages (2) refer to the first and final stages
- **Paragraph 3:** report on what takes place in steps 1 and 2.
- **Paragraph 4:** report on what takes place in steps 3, 4 and 5.

Report:

The diagram illustrates the various steps required to produce carbonated drinks.

Overall, there are five stages, beginning with cleaning the water that will be used, and ending with the packaging and delivery of the finished product to supermarkets.

At **the beginning** of the manufacturing process, raw water is filtered and first water softener and then chemicals are added to clean the water. **Next, at the second stage** of heating evaporation and carbonation, this clean water is pumped to electric heaters before it is passed through a cooling pipe. It is mixed with carbon dioxide and this carbonated water is then passed through another pipe, ready for the third stage.

At **stage three**, this carbonated water enters a mixing tank. Here, it is mixed with colouring, syrup and flavouring. This is **then** passed through another filter and put into bottles or cans at **the fourth stage**. **Finally**, these bottles and cans are packaged and transported in trucks to supermarkets.

158 words

T2: Politicians should take more responsibility for preventing and solving global environmental problems, because individuals can do very little.

Do you agree or disagree?

Essay Plan:

- **Introduction:** I agree - individuals can take small actions, but politicians must take more responsibility.
- **Paragraph 2:** individuals can (1) consume less, recycle and use products that are environmentally friendly (2) they can join groups working to protect the environment.
- **Paragraph 3:** politicians must do much more – they have power and money. They should (1) make and enforce international agreements to fight climate change (2) make public transport cheaper and more available (3) pass laws to stop pollution, for example the pollution of our rivers and oceans.
- **Conclusion:** individuals must do some things, but politicians have much more power and responsibility to act and protect the environment.

Essay:

While individuals must play a part in protecting our environment, politicians have access to vast resources, **such as** money and power, to enable them to act and tackle global environmental problems. I agree, therefore, that they should accept greater responsibility and that, in comparison, individuals are relatively powerless.

Although their power to act is limited, there are many environmentally friendly actions that individuals have a responsibility to take. **One important step** is to reduce personal consumption of the Earth's finite resources, and this includes using our cars less and public transport more. It also includes recycling and re-using products, and buying things which are bio-degradable and produced sustainably, **such as** organic foods. **Another vital step** is for individuals to join with others to develop a strong green movement. They should throw their weight behind organisations working in various ways to prevent an ecological crisis.

In contrast, governments have enormous powers to solve global environmental problems, and politicians should be held more responsible. **Firstly**, they must make strong international agreements to take action on global warming. Politicians everywhere should agree to pass laws

to fight climate change, by cutting down on emissions and reducing dependence on fossil fuels. **Secondly**, they must act to upgrade and expand public transport provision. They have the power to subsidise the cost of fares, to issue free bus and train passes, and to introduce congestion charges to reduce traffic in cities. **Finally**, politicians ought to prevent pollution, **for example** by enforcing laws to stop the discharge of chemical waste into rivers or the sea by industries or agriculture.

In conclusion, I believe that individuals ought to act in many small ways, **although** politicians have much greater capacity to act and have a huge responsibility to act urgently to solve global environmental problems.

296 words

Vocabulary from the environment:

- **environmentally friendly**
Meaning: behavior or products that do not harm the environment
Example: We can help to protect the environment by using detergents and cosmetics that are **environmentally friendly**.
- **to be bio-degradable**
Meaning: a substance or chemical that can be changed to a natural harmless state by the action of bacteria
Example: Most plastics **are not biodegradable**, and remain as waste products in the environment for thousands of years.
- **the green movement**
Meaning: all the organisations concerned with the protection of the environment
Example: Individuals should join one of the organisations which form part of **the green movement**, in order to campaign for changes in official policy on the environment.
- **to throw one's weight behind sth**
Meaning: To use one's influence to help support something
Example: The council is **to throw its weight behind** a campaign to save one of the borough's best-loved beauty spots.
- **an ecological crisis**
Meaning: a serious situation that occurs when the environment of a species or a population changes in a way that destabilizes its continued survival
Example: Environmental degradation caused by human activity is provoking **an ecological crisis** which threatens our existence.
- **to take action on global warming**
Meaning: to do what has to be done on problems related to global warming
Example: There have been numerous international conferences to warn of the dangers, but many governments have refused **to take action on global warming**.

- **to fight climate change**
Meaning: To try to prevent changes in climate patterns, such as rainfall, temperature and winds.
Example: Unless we consume less of the Earth's natural resources, it will be impossible **to fight climate change** and safeguard our future.
- **to cut down on emissions**
Meaning: to reduce the amount of gases sent out into the air
Example: People must be made aware of the need **to cut down on emissions** from their cars if we are to reduce air pollution.
- **to reduce the dependence/reliance on fossil fuels**
Meaning: to decrease people's consumption of fossil fuels, like oil, coal or gas.
Example: Governments must invest heavily in solar and wind energy projects in order **to reduce our dependence/reliance on fossil fuels**.
- **to discharge chemical waste**
Meaning: to dispose of waste products from chemical processes.
Example: Nowadays, more and more companies and industrial zones have been **discharging chemical waste** into rivers, causing death to many fish and other aquatic animals.

Vocabulary from *transport*:

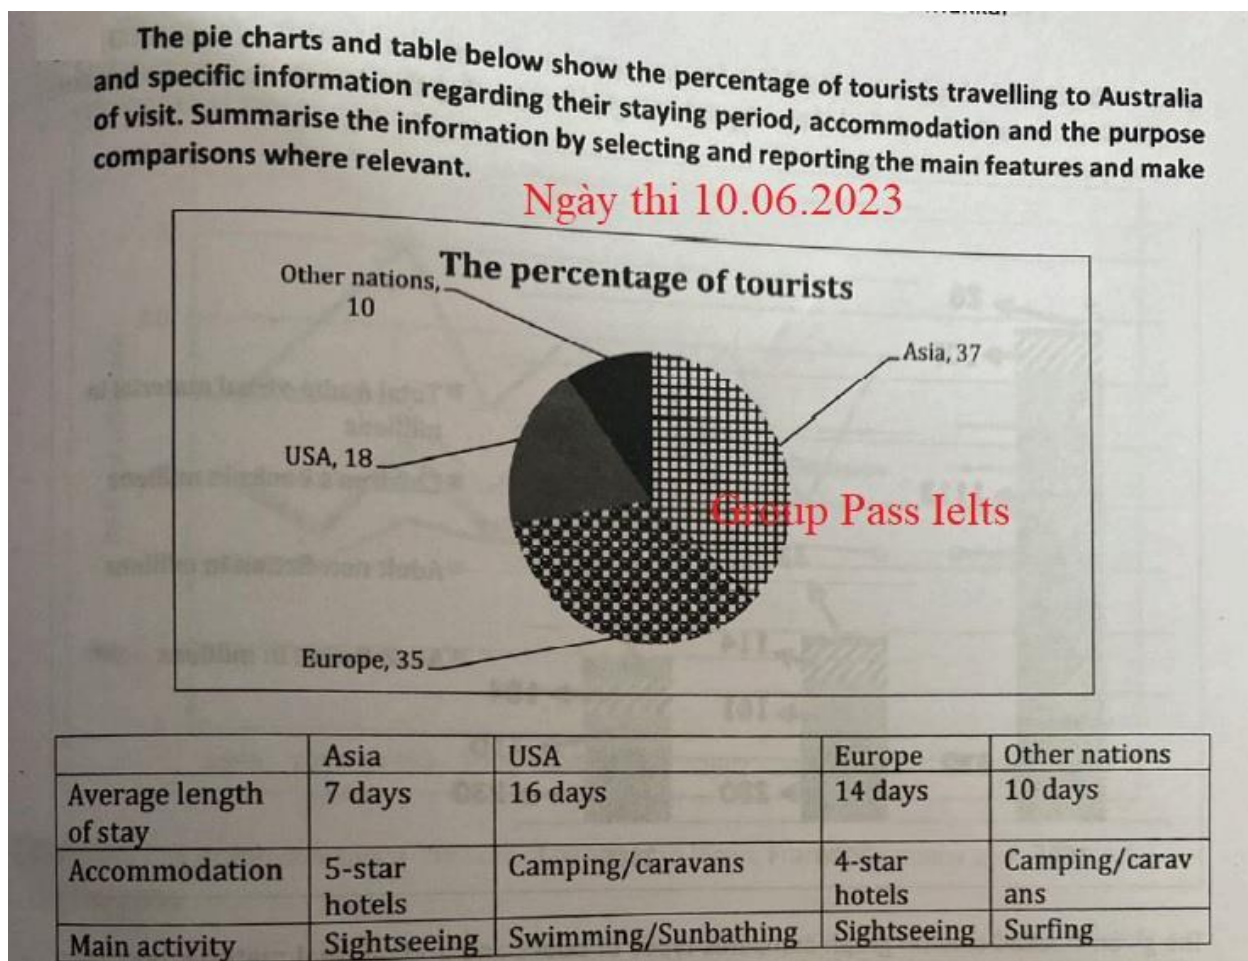

- **to upgrade and expand public transport provision**
Meaning: to improve bus and train services and to make these services more available
Example: One way to reduce traffic on the roads is **to upgrade and expand public transport provision**.
- **to subsidise the cost of fares**
Meaning: to give money to a business or organization to help to pay for the cost of using public transport
Example: Governments must **subsidise the cost of fares** on public transport.
- **free bus/train passes**
Meaning: documents which allow you to travel free on buses or trains
Example: Issuing **free bus and train passes** to children and the elderly would encourage more people to use public transport.
- **congestion charge**
Meaning: an amount of money that people have to pay for driving their cars into the centre of some cities, as a way of stopping the city centre from becoming too full of traffic

Example: More cities should follow the example of London and introduce a **congestion charge** in order to ease traffic flow in the city centre.

Other vocabulary:

- **vast** [adjective]:
Meaning: of very great size, amount or extent
Example: The general was in command of a **vast** army of 100,000 soldiers.
- **to tackle** [verb]:
Meaning: *to make an organized and determined attempt to deal with a problem*
Example: Governments in the USA have failed **to tackle** the problem of homeless people, and as a result many thousands of people sleep in the streets.
- **powerless** [adjective]:
Meaning: unable to control or prevent something
Example: The driver was **powerless** to stop his car, and it crashed into a tree.
- **finite** [adjective]:
Meaning: limited in size, amount or length of time
Example: There is a **finite** time allowed to complete the exam paper – only 60 minutes.
- **sustainably** [adverb]:
Meaning: in a way that does not harm the environment
Example: The forest is managed **sustainably**. Every tree that is cut down is replaced by a new tree that is planted.

Task 1

Report Plan:

- Paraphrase paragraph: 1 sentence for each type of diagram; show > compare, provide information on; percentage > proportion; purpose of visit > main activity
- Overview/summary paragraph: (1) pie chart – highest % of travellers (Asia and Europe) (2) table – refer to the 3 categories in the left column (length of stay, accommodation and main activity).
- Paragraph 3: select, report and compare the information in the pie chart
- Paragraph 4: select, report and compare the information in the table

Report:

The pie chart compares the proportion of tourists travelling to Australia from various parts of the world. The table provides information on their average length of stay, type of accommodation and their main activity during their stay.

Overall, the highest percentage of travellers came from Asia and Europe. Travellers stayed in hotels, caravans or camped for between 7 and 16 days, enjoying sightseeing, swimming or surfing.

Travellers from Asia and Europe formed the largest proportion who visited Australia, at 37% and 35%, respectively. This was around double the proportion of US travellers, **while** visitors from other nations comprised 10% of the total.

The table indicates that on average US travellers stayed 16 days, slightly longer than Europeans at 14 days, **while** visitors from other nations stayed 10 days and Asian travellers just 7 days. Asian and European visitors stayed in 5 or 4 star hotels, **whereas** visitors from the USA and other nations preferred camping or caravans. **Finally**, sightseeing was the main activity among Asians and Europeans. **By contrast**, visitors from the USA and other nations preferred beach activities such as swimming, surfing or sunbathing.

185 words

Task 2: More and more people are becoming seriously overweight. Some people think a solution can be to increase the price of fattening foods. To what extent do you agree or disagree?

Essay Plan:

- **Introduction:** refer to the statement. **Opinion:** partly agree – it would help to solve the problem, but along with other measures
- **Paragraph 2:** agree – governments should raise taxes on fattening foods. People would eat them less because of the higher prices. Examples: eat less at fast food chains (McDonald's), eat fewer take away meals or sweets in shops.
- **Paragraph 3:** other measures needed (1) healthy eating campaigns (2) tackle other causes of obesity e.g. sedentary lifestyles
- **Conclusion:** partly agree – increasing prices would reduce consumption of these foods, but other measures are also necessary.

Essay:

It is true that a growing number of people are becoming prone to obesity. **While** eating too much junk food, full of fat and sugar, is one very important factor, it is not the only one. Therefore, I partly agree that raising the price of fattening foods would help to solve the problem, although this should be undertaken along with other measures.

I concur with the view that governments should raise taxes on processed foods that are detrimental to health and that encourage consumers to be addicted to too much sugar and fat. This measure would reduce demand, as people simply could not afford to eat regularly at fast food chains, **such as** McDonald's or Pizza Hut. They would also have to cut down on take away meals and ready meal deliveries for the same reason. Governments ought also to increase the price of sweets and sugary drinks for sale in shops and supermarkets by raising taxes.

However, I believe that there are also other steps which must be taken to tackle the problem. **Firstly**, health awareness campaigns are very effective in promoting healthy eating habits.

These campaigns could range from encouraging people to go on a diet, to consuming food that is low in fat and high in fibre. **Secondly**, people commonly put on weight for other reasons, **for example** if they have a sedentary lifestyle. Increasing the price of fattening foods would not address this bad habit. Encouraging fitness should be high on the agenda of governments.

In conclusion, I would agree with those who argue that increasing the price of fattening foods would be one solution to the growing problem of obesity. It must, **however**, be just one of a series of measures to tackle the issue effectively.

291 words

Vocabulary from *health*:

- **to be prone to obesity**
Meaning: to be likely to become fat [in an unhealthy way]
Example: Children who are addicted to watching television, instead of playing outdoor games, **are more prone to obesity**.
- **to be detrimental to health**
Meaning: to be harmful to health
Example: Lying in the sun for too long can **be detrimental to health** and result in skin cancers.
- **to be addicted to sth**
Meaning: to be unable to stop taking harmful drugs, tobacco or alcohol.
Example: More specialist clinics, offering treatment and advice, are required to help people who **are addicted to** drugs.
- **health awareness campaigns**
Meaning: publicity to encourage people to be concerned about looking after their health.
Example: Public **health awareness campaigns** are essential if people are to accept that they have a personal responsibility to look after their own health.
- **healthy eating habits**
Meaning: eating healthy food at regular times of the day
Example: Health education involves teaching people about **healthy eating habits**, such as regular mealtimes and eating fruit and vegetables every day.
- **sedentary lifestyle**
Meaning: involving little exercise or physical activity
Example: A **sedentary lifestyle** is a major factor in health problems such as obesity and heart disease.

Vocabulary from *food and diet*:

- **junk food**

Meaning: food that is quick and easy to prepare and eat, but that is thought to be bad for your health

Example: The consumption of too much **junk food** is a major factor in the increase of childhood obesity.

- **fast food chains**

Meaning: groups of shops owned by the same company, serving food to the public

Example: Healthy eating means avoiding eating out at **fast food chains** like McDonald's or Pizza Hut.

- **to go on a diet**

Meaning: to eat less, or to eat only certain types of food in order to lose weight

Example: Many people in the West eat too much and – from time to time – have **to go on a diet**.

- **low in fat and high in fibre**

Meaning: a diet which does not contain much fat, but which contains foods which have a lot of fibre

Example: A healthy vegetarian diet is typically **low in fat and high in fibre**.

- **to put on weight**

Meaning: to become fatter and heavier

Example: Those who wish to avoid **putting on weight** should avoid fatty and sugary foods.

Vocabulary from government:

- **to raise taxes on**

Meaning: to increase the amount of tax on something

Example: Governments should **raise taxes on** cigarettes to persuade more people to give up smoking.

- **high on the agenda**

Meaning: something which is among the first things in the list of actions to be taken

Example: The rehabilitation of prisoners must be **high on the agenda** of prison authorities everywhere.

Other vocabulary:

- **to concur** [verb]:

Meaning: to agree

Example: Scientists **concur** that global warming is taking place rapidly.

- **to cut down on** [phrasal verb]:

Meaning: to reduce the amount, size or number of something

Example: His doctor advised him **to cut down on smoking** because of his health.

- **sugary** [adjective]:

Meaning: containing sugar

Example: He has to see the dentist regularly because the **sugary** snacks that he likes are harmful for his teeth.

- **to address** [verb]:

Meaning: to think about a problem and decide how to deal with it

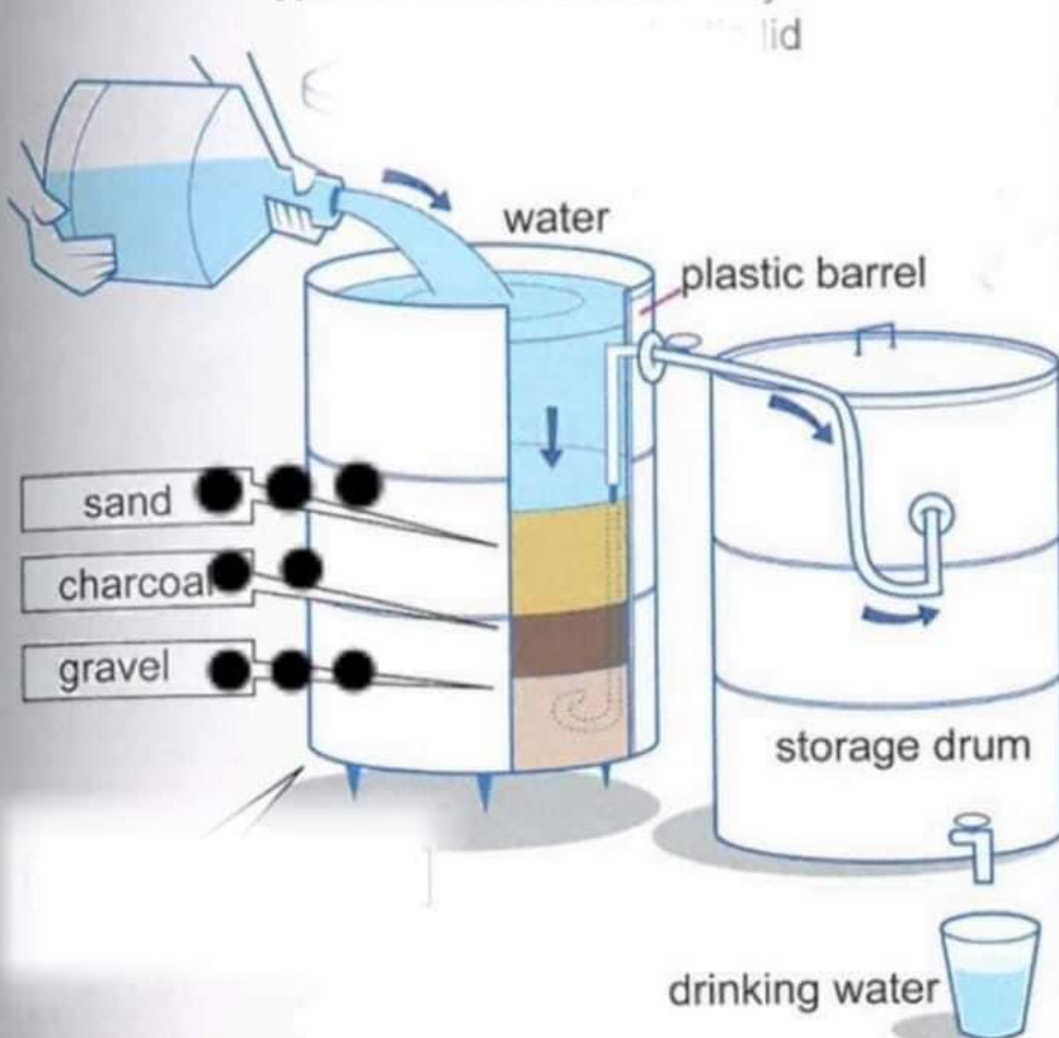

Example: The government plans **to address** the problem of traffic congestion in the capital city.

Task 1

The diagram below shows a simple system that turns dirty water into clean water.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Water-Filter Assembly

Report Plan:

-
- + Thông tin khóa học Package online: <https://ieltsngocbach.com/package>
 - + Thông tin lớp trực tiếp khai giảng sớm nhất: <https://ieltsngocbach.com/offline>
 - + Hotline tư vấn đăng ký học: 0974657403 (email tư vấn: ieltsbach1707@gmail.com)

- **Paraphrase paragraph:** shows>illustrates; system>water filter assembly; turns dirty water into clean water>cleaning dirty water to produce drinking water
- **Overview/summary paragraph:** (1) there are 7 stages (2) refer to the first and last stages
- **Paragraph 3:** report on the stages of filtering the dirty water in the plastic barrel
- **Paragraph 4:** report on the final stages of transferring the water to the storage drum and opening the tap

Report:

The diagram illustrates a simple water filter assembly for cleaning dirty water to produce drinking water.

Overall, there are seven stages in the process of producing clean water, beginning with the supply of dirty water and ending with the production of clean drinking water.

At the first stage, dirty water is poured into the top of a plastic barrel. It **then** passes through three filters in turn. The top filter is sand, followed by charcoal and, at the bottom of the barrel, gravel. As a result of the filtering process, the water is clean and ready to drink.

Next, the filtered water is transferred to a storage drum. A pipe connects the barrel and the drum. One end of the pipe is located in the gravel, and this pipe **then** conducts the filtered water into the storage drum. **Finally**, a tap located at the bottom of the storage drum may be opened to allow the clean water to be collected for drinking.

162 words

Task 2: The use of mobile phones is as antisocial as smoking. Smoking is banned in certain places so mobile phones should be banned like smoking. To what extent do you agree or disagree?

Essay Plan:

- **Introduction:** my opinion – partly agree. Some restrictions are necessary, but I am not in favour of a total ban.
- **Paragraph 2:** situations where mobile phones should be banned. Examples: schools, libraries, drivers
- **Paragraph 3:** situations where a more tolerant policy can be adopted. Examples: segregating mobile phone users on public transport – compare smoker segregation in workplaces
- **Conclusion:** partly agree – bans in some situations, but not a total ban

Essay:

Although smoking in public is a danger to the health of others, in certain public places the overwhelming majority of people would also consider the use of mobile phones as antisocial

behaviour. **While** I agree that a restriction on using mobile phones is sometimes necessary, I believe that a blanket ban should not be imposed.

On the one hand, in some situations it is good policy to ban the use of mobile phones. **For example**, in a classroom or a library, people wish to read or to study without the distraction of noise. There would be an outcry from library-users if people were to be permitted to chat on their mobile phones. **A more serious example** is the need to make illegal the use of mobile phones whilst driving a vehicle. This is not only antisocial, but it is also incompatible with safety on the roads, possibly resulting in a fatal accident.

On the other hand, in order to live in harmony with one another, it should be socially acceptable to tolerate the use of mobile phones in some circumstances. It may be possible, **for instance**, to segregate people on public transport by designating chat areas on trains or buses, in the same way that in many workplaces smokers are allowed to use certain permitted areas. This would reduce the annoyance to others and might be an acceptable code of conduct in the opinion of a majority of people. **Although** traditional ideas of consideration for others have fallen by the wayside, talking loudly on a mobile phone in public is selfish and thoughtless.

In conclusion, while I would agree that the use of mobile phones in public should be restricted, a general ban would be too extreme a measure to try to impose.

293 words

Vocabulary from *society*:

- **an outcry (at/over/against something)**
Meaning: a reaction of anger or strong protest shown by people in public
Example: The new tax provoked a **public outcry**.
- **to be socially acceptable**
Meaning: agreed or approved of by most people in a society
Example: Smoking in public places is no longer **socially acceptable** in many countries.
- **segregate somebody (from somebody)**
Meaning: to separate people of different races, religions or sexes and treat them in a different way
Example: Although society no longer tolerates the policy of **segregating whites from blacks**, many people of different origins live in their own separate communities.

Vocabulary from *traditional versus modern*:

- **to be incompatible with**
Meaning: not able to exist or work with another person or thing because of basic differences
Example: The way of life of indigenous peoples **is incompatible with** modern cultures.
- **to fall by the wayside**

Meaning: if something falls by the wayside, it is no longer used

Example: An increasing reliance on modern technology has resulted in some conventional skills **falling by the wayside**.

Vocabulary from *communication and personality*:

- **to live in harmony with one another**

Meaning: to live with others in a way which avoids conflict or disagreement

Example: The students who share the house are all good friends and they are able **to live in harmony with one another**.

- **codes of conduct**

Meaning: voluntary rules which people accept in a situation

Example: The **Code of Conduct** is voluntary but it is seen as a sign of best practice.

Other vocabulary:

- **overwhelming** [adjective]:

Meaning: very great or very strong, so that it is impossible to resist

Example: There was **overwhelming** support for the new laws to protect the rainforest.

- **a blanket ban** [expression]:

Meaning: a ban that applies to or that affects everyone or everything

Example: **A blanket ban** on the sale of tobacco would result in illegal sales of cigarettes.

- **distraction** [noun]:

Meaning: a thing that takes your attention away from what you are doing or thinking

Example: Working from home has too many **distractions** compared with working in an office.

- **to designate** [verb]:

Meaning: to indicate for a special job or purpose

Example: This space in the new building **is designated** as a storeroom in the plans.

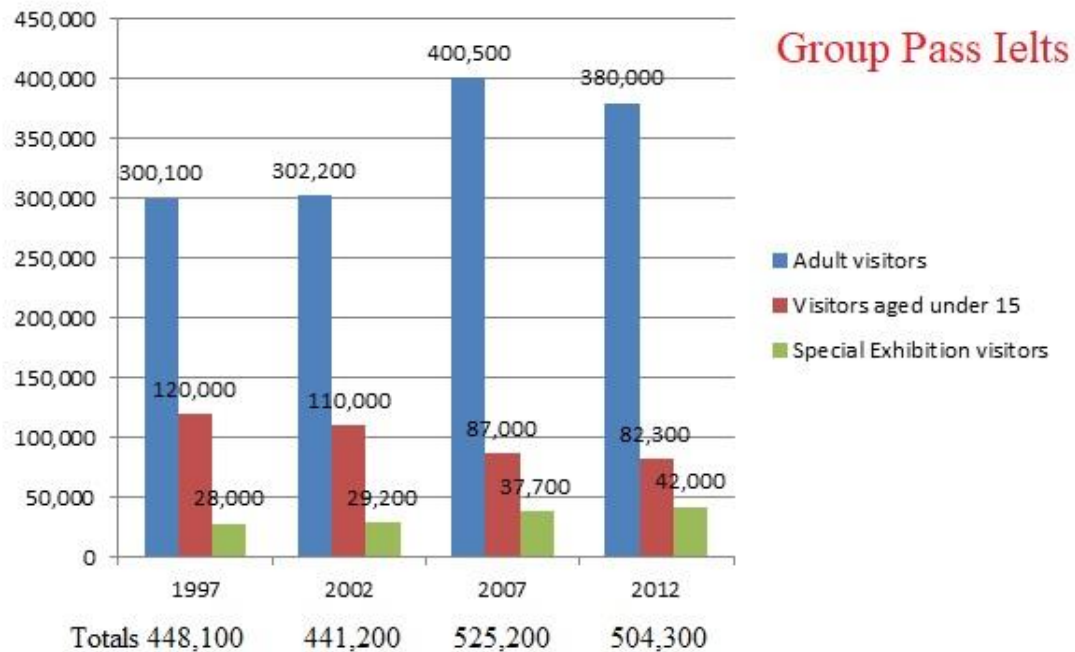

- **thoughtless** [adjective]:

Meaning: not concerned about the effects on other people of what you do or say

Example: He made a **thoughtless** remark about her appearance which upset her.

Task 1

Task 1: The chart below show the number three types of visitor to a museum between 1997 and 2012.

Report Plan:

- **Paraphrase paragraph:** shows > illustrates; the number of 3 types of visitor > visitor numbers; between 1997 and 2012 > at intervals of 5 years from 1997 to 2012
- **Overview/summary paragraph:** (1) the number of visitors fluctuated over the period (2) visitor numbers aged under 15 fell, but the figure for visitors to special exhibitions rose
- **Paragraph 3:** select, report and compare figures for total visitor numbers
- **Paragraph 4:** select, report and compare figures for visitors aged under 15 and visitors to special exhibitions. Contrast the fall and rise in these two trends

Report:

The chart illustrates visitor numbers to a museum at intervals of 5 years from 1997 to 2012.

Overall, the number of visitors fluctuated over the period. **While** the figure for visitors aged under 15 fell, the number of those who visited special exhibitions rose.

A total of 448,100 people visited the museum in 1997, but this figure decreased by approximately 7,000 in 2002. **However**, in 2007 the total number of visitors reached a peak of over 525,000 before falling to around 504,000 in 2012.

In 1997, adult visitors to the museum numbered 300,100. This figure increased slightly in 2002, before rising sharply to 400,500 in 2007. It then decreased to 380,000 in 2012. There was a decrease in the number of visitors aged under 15, from 120,000 in 1997 to 82,300 at the end of the period. **By contrast**, the figure for those who visited special exhibitions rose significantly from 28,000 in 1997 to 42,000 in 2012.

157 words

Task 2:

The best way for a government to prepare for the future is to invest resources in its young people. To what extent do you agree or disagree?

Essay Plan:

- **Introduction:** refer to the key words in the question (future/governments/resources/young people). Agree with the statement, but note that there are other areas which need the investment of resources
- **Paragraph 2:** other areas that require future government expenditure: (1) space exploration – example: satellite technology (2) protecting the environment
- **Paragraph 3:** agree that the best way to invest government resources for the future is to invest in young people. Example: refer to some things that young people will do in the future for which they will need training and education, in particular refer to space exploration and the environmental challenge.
- **Conclusion:** agree with the statement.

Essay:

In the future, it is probable that governments will need to devote more resources to the training and education of young people. **While** there are other areas in which investment is necessary to promote the future well-being and happiness of everyone, I agree that governments should prioritise expenditure on investment in the younger generation.

In order to prepare for the future, governments need to adopt policies which will result in socio-economic changes that will benefit everyone and provide funding for these policies. **One policy** should be to pour money into space research. **For example**, people already enjoy new means of communication as a result of satellite technology, and the conquest of space opens all kinds of possibilities for the future. **Another policy** which should be high on the agenda for government funding is to deal with the ecological crisis which the world is facing. Resources must be allocated to policies to take action on global warming and to achieve sustainable development.

However, I agree with the view that in order to prepare for the future, the best option for governments is to invest in the training and education of young people. Young people will pioneer further advances in technology. **For instance**, they will be the astronauts who undertake

space missions and establish new space stations. They will develop robotics technology, which is still in its infancy. Young people will lead the environmental challenge which threatens human existence, and funding their education should provide them with the skills and social conscience to create a greener society.

In conclusion, I wholly agree that the best way to meet the challenges of the future is for governments to invest resources in educating and training the younger generation as its top priority.

289 words

Vocabulary from *government*:

- **to prioritise expenditure on**

Meaning: to put the need to spend money on certain things first

Example: I believe that it is important **to prioritise expenditure on** medical research in order to save lives.

- **to adopt policies**

Meaning: to start to use particular policies

Example: In order to deal with traffic congestion, the government must **adopt policies** to restrict the use of private cars.

- **to provide funding for**

Meaning: to give money to enable something to be done

Example: **Providing funding for** health care must be a priority of governments.

- **high on the agenda**

Meaning: something which is among the first things in the list of actions to be taken

Example: The rehabilitation of prisoners must be **high on the agenda** of prison authorities everywhere.

- **to allocate resources to**

Meaning: to make money and materials available to do something

Example: If governments **allocate more resources to** improving public transport, this will reduce the problem of traffic congestion in cities.

- **to be a government priority**

Meaning: something which is so important that the government should deal with it first.

Example: In developing countries, spending on health and education should **be top government priorities**.

Vocabulary from *society*:

- **socio-economic changes**

Meaning: changes relating to the society and economy of a country

Example: Mass migration to cities is a result of **socio-economic changes** that include the industrialisation of agriculture.

Vocabulary from *space exploration*:

- **to pour money into space research**

Meaning: to spend enormous amounts of money on space research

Example: Some people argue that it is wasteful **to pour money into space research**.

- **satellite technology**

Meaning: the technology of sending electronic devices into space for communications purposes

Example: **Satellite technology** has resulted in huge advances in communications and information-gathering.

- **the conquest of space**

Meaning: the act of gaining control over the difficult task of exploring space

Example: **The conquest of space** is a challenge that continues to inspire the public imagination.

- **space missions**

Meaning: flights into space

Example: Recent **space missions** have begun to explore Mars and more distant parts of the universe.

- **a space station**

Meaning: a large structure that is sent into space and remains above the earth as a base for people working and travelling in space

Example: Even maintaining an **international space station** is so expensive that the costs must be shared by several countries.

Vocabulary from *the environment*:

- **an ecological crisis**

Meaning: a serious situation that occurs when the environment of a species or a population changes in a way that destabilizes its continued survival

Example: Environmental degradation caused by human activity is provoking **an ecological crisis** which threatens our existence.

- **to take action on global warming**

Meaning: to do what has to be done on problems related to global warming

Example: There have been numerous international conferences to warn of the dangers, but many governments have refused **to take action on global warming**.

- **to achieve sustainable development**
Meaning: economic development that is achieved without depleting natural resources
Example: Organic methods must be introduced everywhere in order **to achieve sustainable development** in agriculture.

Vocabulary from *technology*:

- **advances in technology**
Meaning: the improvement or development in technology
Example: Recent **advances in medical technology** are making a great contribution to the search for a cure for Aids.
- **robotics technology**
Meaning: the design, construction and operation of robots
Example: There are examples of **robotics technology** everywhere, from space programs to manufacturing.
- **to be in its infancy**
Meaning: to be in the early development of something
Example: It is clear that robotics technology is **still in its infancy**, and it is impossible to imagine the possible future developments.

Other vocabulary:

- **to devote** [verb]:
Meaning: to give an amount of time, money, or attention to something
Example: **I devote** three hours of study each day to prepare for the exam.
- **well-being** [noun]:
Meaning: general health and happiness
Example: The friendly attitude of the nurses and doctors contributed to the **well-being** of patients in the hospital.
- **to pioneer** [verb]:
Meaning: to be the first person to study and develop a particular area of knowledge or skill
Example: Her ambition is **to pioneer** a new vaccine to combat the COVID virus.

WRITING TASK 1

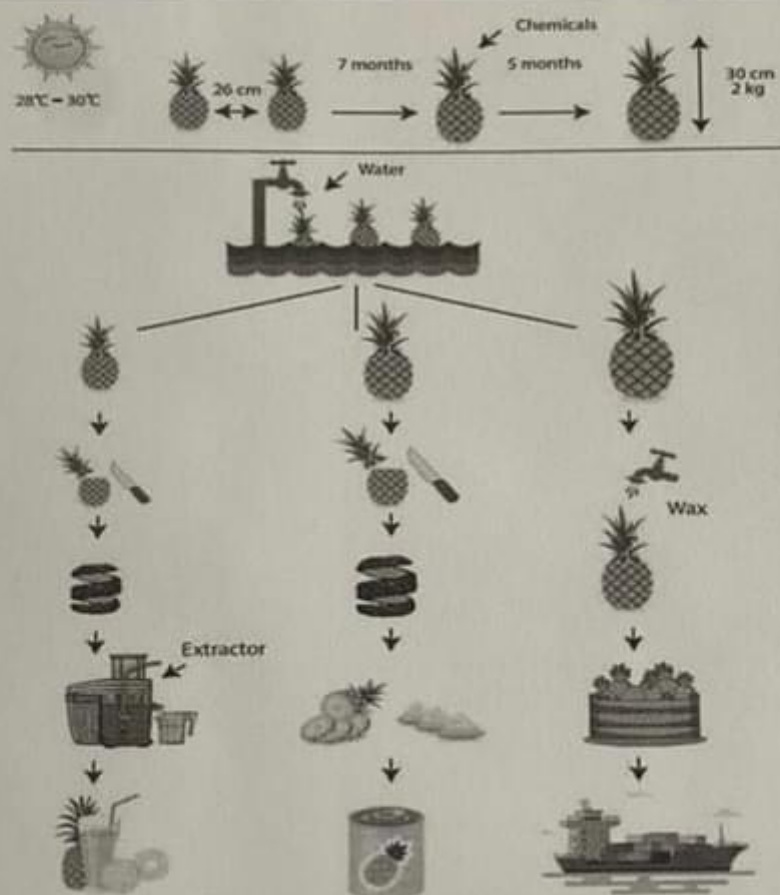

You should spend about 20 minutes on this task.

The diagram below shows the process of growing and preparing pineapples and pineapple product

Summarise the information by selecting and reporting the main features and making comparisons where relevant.

Write at least 150 words.

Group Pass Ielts

Report Plan:

- Paraphrase paragraph: diagram>chart; shows>illustrates; the process of growing and preparing>how pineapples are grown and prepared
- Overview/summary paragraph: (1) a growing stage (2) processing as juice, canned fruit or whole pineapples

- **Paragraph 3: report on the growing stage**
- **Paragraph 4: report on production of pineapple juice and contrast with process of canned pineapple products. Report on preparation and transport of large, whole pineapples.**

Report:

The chart illustrates how pineapples are grown and prepared for sale, along with various pineapple products.

Overall, the process begins with a growing stage, after which pineapples are either pressed to make juice, canned or simply prepared for sale as fruit.

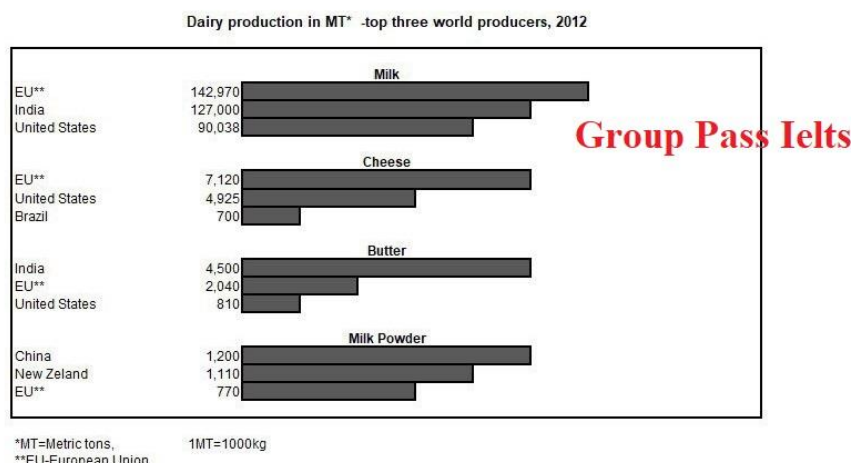

Pineapples require a year to grow to a suitable size for processing or marketing. They need a temperature of about 28-30 degrees during this time. The plants are spaced in rows 26cm apart, and after 7 months they are sprayed with chemicals. The largest plants weigh 2kg and reach a height of 30cm when they are harvested.

After picking, all the pineapples are washed in water. The crown and skin of the small and medium-sized ones are removed. The medium ones are then cut into rings or chunks and canned, **whereas** the small pineapples are pressed in an extractor to produce pineapple juice. **Finally**, the largest pineapples are simply waxed and packed whole in crates before transportation, often by sea, to markets for sale.

165 words

Đề 10/11/2023

The charts below give information about the world's top three producers for four different dairy products (milk, cheese, butter, milk powder) in the year of 2012.

Report Plan:

- **Paraphrase paragraph:** give information>provide data; the world's top three producers>the highest world producers; four different dairy products>milk, cheese, butter and milk powder
- **Overview/summary paragraph:** (1) the EU produced the most milk and cheese (2) production of milk was much higher than production of cheese, butter and milk powder
- **Paragraph 3:** report and compare figures for the production of milk and cheese
- **Paragraph 4:** report and compare figures for the production of butter and milk powder

Report:

The charts provide data about the production of milk, cheese, butter and milk powder by the highest world producers in 2012.

Overall, the European Union (EU) led the way in milk and cheese production. **In terms of** metric tons, the production of milk far exceeded that of the other dairy products.

The EU produced almost 143,000 metric tons of milk, **compared with** 127,000 metric tons in India and around 90,000 metric tons in the USA. The production of cheese in the EU was just over 7,000 metric tons, **while** the USA produced almost 5,000 metric tons and Brazil produced 700 metric tons.

India led world production of butter with 4,500 metric tons, more than double the figure for the EU, with production in the USA totalling just over 800 metric tons. **Finally**, China produced 1,200 metric tons of milk powder, a slightly higher figure than in New Zealand and the EU, with 1,110 and 770 metric tons, respectively.

158 words

Task 1 :

WRITING TASK 1

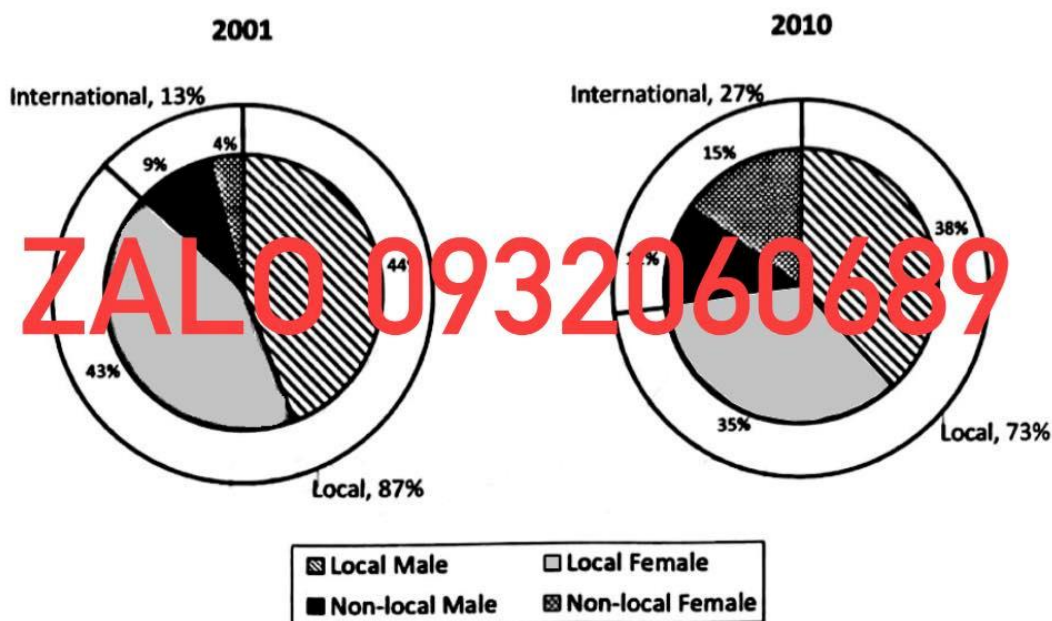

You should spend about 20 minutes on this task.

The table and pie charts below show the number of research students in Australian universities in 2001 and 2010.

Summarise the information by selecting and reporting the main features, and make comparison where relevant.

Write at least 150 words.

	Local research students	International research students	Total
2001	33,657	5,192	38,849
2010	39,488	14,593	54,081

Report Plan:

- **Paraphrase paragraph:** show > illustrates/compares; write separately about (1) the table (2) the pie charts
- **Overview/summary paragraph:** (1) the table: the total numbers of research students higher in 2010 compared with 2001 (2) the pie charts: the % of non-local female students increased significantly in 2010 compared with 2001.
- **Paragraph 3:** the table: select, report and compare the numbers
- **Paragraph 4:** the pie charts: select, report and compare the percentages

Report:

The table illustrates the number of research students, both local and international, in Australian universities in 2001 and 2010, **whereas** the pie chart compares the percentages and genders of local and non-local research students.

Overall, the total number of those doing research was higher in 2010 than in 2001. The proportion of non-local female students increased significantly in 2010 **compared with** 2001.

In 2001, over 33,000 local and over 5,000 international students were carrying out research in Australian universities. **While** in 2010 the figure for local researchers rose to over 39,000, the number of international research students increased even more dramatically to almost 15,000. The total number of researchers therefore went up by more than 15,000 in 2010 **compared with** 2001, to reach a figure of over 54,000.

The percentage of international research students in 2010 was more than double the figure for 2001. **Although** the total proportion of local male and female students doing research fell from 87% in 2001 to 73% in 2010, **in contrast** the percentage of non-local female research students rose from 4% in 2001 to 15% in 2010 and the proportion of non-local male students conducting research increased from 9% to 12%.

197 words

Note by NgocBach:

IELTS candidates may not notice two things here: (1) the table gives numbers, and the pie charts give %. Students should never confuse numbers with percentages. The word 'figure', however, can be used to refer to either numbers or percentages. The task statement makes this mistake: the pie charts do NOT refer to numbers.

(2) A few sites wrongly suggest that students try to find synonyms for categories given in the diagrams. They should not do this. They should use the categories supplied in the diagrams, for example '*international research students*'/'*non-local*'. They can occasionally change these only a very little – see my model answer. This is not good:

Task 2:

Most countries aim to improve their standard of living through economic development, but many important social values can be lost as a result. Do the advantages of economic development outweigh the disadvantages?

Essay Plan:

- **Introduction:** refer to the task statement. My opinion – disadvantages of economic development outweigh the advantages
- **Paragraph 2:** the need for economic development (1) to feed the population -land reform one possible measure (2) to finance health, education, social housing, infrastructure e.g. clean water, electricity, clinics, schools.
- **Paragraph 3:** the problem of economic development – benefits individuals, destroys social values. Examples South Africa, Brazil – cash crops for export to rich countries, not affordable food for their own citizens.
- **Conclusion:** the drawbacks of economic development usually outweigh the benefits.

Essay:

Economic development is regarded by decision-makers in many countries as the key to improving living standards. **While** there are some advantages in developing the economy, I would argue that essential social values are usually lost as a result, and that the disadvantages of economic development all too often outweigh the benefits.

On the one hand, economic development is sometimes necessary if a country is to provide for the basic needs of all its citizens. **Firstly**, food production must be stimulated so that nobody goes hungry. Land reform, with land re-distributed to the most wretched and poverty-stricken in society, is one route to increasing agricultural production. **Secondly**, economic development is often seen as a way to increase the revenue of governments in order to finance spending on health, education, housing, and infrastructure. **For example**, everyone needs not only a house to live, but also clean water, electricity, clinics and schools. **Therefore**, if handled correctly economic development has the potential to take place without destroying social values.

On the other hand, the major disadvantage of economic development is that it usually benefits the few who are already rich and powerful. Without a social conscience, they make calculations based on maximising their own profits. In South Africa and Brazil, **for example**, landowning corporations or individuals use the most fertile land to produce cash crops for export to Europe or the USA while their own populations struggle to feed themselves. Little of their wealth is used to improve health, education, social housing or infrastructure while, at the same time, natural resources are depleted and toxic waste from industrial processes is dumped in rivers and seas.

In conclusion, most countries carry out economic development in ways which do not take into account social needs and values. **Thus**, the disadvantages generally outweigh the advantages.

298 words

Written by NgocBach

Vocabulary from *society*:

- **to be poverty-stricken**

Meaning: to be extremely poor, having almost no money

Example: Many non-government organisations work with people who **are poverty-stricken** in developing countries.

- **social conscience**

Meaning: the state of being aware of the problems that affect a lot of people in society, such as being poor or having no home, and wanting to do something to help these people

Example: Charities depend on the **social conscience** of the public in order to obtain donations and recruit volunteer helpers.

Vocabulary from *business and money*:

- **revenue**

Meaning: the money that a government receives from taxes or which a company receives from its business

Example: The tax **revenues** of the government have fallen as a result of the economic crisis.

- **to make a calculation**

Meaning: to assess a situation and figure out (or guess) the outcome

Example: We cannot **make a precise calculation** of the price until we have all the costs.

- **to maximise profits**

Meaning: to increase profits to the highest possible level

Example: The company has hired a marketing consultant to recommend how to **maximise profits** next year.

- **to take something into consideration/ account**

Meaning: to consider or remember something when judging a situation

Example: No business will succeed if it fails **to take** the needs of customers **into account/into consideration**.

Vocabulary from *the environment*:

- **to deplete natural resources**

Meaning: to reduce the amount of natural resources.

Example: Timber companies must not be allowed **to deplete natural resources** by cutting down trees without planting new trees to replace them.

- **toxic waste**

Meaning: poisonous, unwanted waste produced by factories

Example: Many species of fish are endangered as a result of the **toxic waste** dumped by industries into the rivers and the sea.

Other vocabulary:

- **to stimulate** [verb]:

Meaning: to make something develop or to encourage something

Example: In order **to stimulate** the economy, the government printed more money.

- **to go hungry** [expression]:

Meaning: to not have enough food to eat

Example: During the war, her family went hungry for many months.

- **wretched** [noun]:

Meaning: those people in a very bad or unpleasant condition

Example: The **wretched** of the earth go hungry and have poor health.
